CyberCatch

CYBER INCIDENT SIMULATOR

OVER $100 BILLION IS SPENT EVERY YEAR ON CYBER SECURITY. Yet attackers keep breaking in, stealing data or inflicting ransomware.

WHY?

Because attackers easily find missing or broken controls and exploit them.

A Key Cyber security Control is an Incident Response Plan and a Table-Top Exercise.

CAN/CIOSC 104: **National Standard Baseline Cyber Security Controls for Small and Medium-Sized Organizations security requirement 5.1 mandates an Incident Response Plan and Testing of the Plan.**

If you are a Small and Medium-Sized Business (SMB), you should implement an Incident Response Plan and regularly test it. Otherwise, you will not be able to respond and recover from a cyberattack and suffer irreparable harm.

> RECENT HEADLINES

Law Firm Hit with Ransomware. Data and systems locked out. Copy of clients data exfiltrated. Clients include Fortune 500.

Defense Contractor Suffers Ransomware. Over 23 Gigabytes of Sensitive Data with National Security Impact Exfiltrated.

Healthcare System Hit. Ransomware locks out system for weeks, patients diverted to other medical offices and hospitals.

Small Business shuts down permanently, unable to resume operations from Ransomware. All employees laid off.
