

CAN/CIOSC 104 Compliance Manager

POWERED BY  CyberCatch

Over \$100 billion is spent every year on cyber security. Yet attackers keep breaking in, stealing data or inflicting ransomware. Why?

Because attackers easily find missing or broken controls and exploit them. **Organizations of all types and sizes are vulnerable to attack.** You may not know which controls to implement, or how-to, and have limited resources.

This is why Canada created a national cybersecurity standard, CAN/CIOSC 104, that prescribes up to 55 cybersecurity controls to keep your organization safe from cyber threats.

It's not a question of IF but WHEN cyber attackers will find your security holes and break in, unless you comply with CAN/CIOSC 104 and implement the necessary controls.

> RECENT HEADLINES

“Small Business shuts down permanently, unable to resume operations from Ransomware. All employees laid off.”

“Healthcare provider hit with two ransomware attacks at once by two different attackers who exploited missing controls.”
